01 / DEFINE THE PROCESS

Standard operating procedure

Describe one recurring task so another person can follow it. Use brief, specific answers.

Process name

What does this process do?

State when it is used and the result it should produce.

Information used or created

Give each item one short name and use that same name in the steps. Include every input and output. Record systems, workspace access, and tools on the step pages instead.

Types: text, number, yes/no, list, or a record with several details.

Item name e.g., request_details	**Type** e.g., text	**Meaning** What does this item contain?	**Source** At start, or step no.

Use the next three pages for steps. Add sheets if needed; keep names and numbers unique.

Type in the boxes and save a copy, or print and write by hand.

02 / DESCRIBE THE WORK

Step 1

Describe one clear action. Use the information names from the first page.

Step name

Who does the work?

Person or role assigned to this step.

Skill needed

Name the skill, or describe the ability needed.

Inputs

Which named information items must be ready before this step begins?

What happens in this step?

Include decisions, checks, approvals, and what to do if something is missing or goes wrong.

Outputs

Name each new information item this step produces and what it contains, or write none.

Required resources

Systems or workspaces this step needs access to.

Suggested resources

Helpful, but the step can run without them.

Hub setup, if known: use registered names. Otherwise leave these for the facilitator.

Executor (runs the step)

Tools (registered actions)

Toolsets (tool groups)

03 / DESCRIBE THE WORK

Step 2

Describe one clear action. Use the information names from the first page.

Step name

Who does the work?

Person or role assigned to this step.

Skill needed

Name the skill, or describe the ability needed.

Inputs

Which named information items must be ready before this step begins?

What happens in this step?

Include decisions, checks, approvals, and what to do if something is missing or goes wrong.

Outputs

Name each new information item this step produces and what it contains, or write none.

Required resources

Systems or workspaces this step needs access to.

Suggested resources

Helpful, but the step can run without them.

Hub setup, if known: use registered names. Otherwise leave these for the facilitator.

Executor (runs the step)

Tools (registered actions)

Toolsets (tool groups)

04 / DESCRIBE THE WORK

Step 3

Describe one clear action. Use the information names from the first page.

Step name

Who does the work?

Person or role assigned to this step.

Skill needed

Name the skill, or describe the ability needed.

Inputs

Which named information items must be ready before this step begins?

What happens in this step?

Include decisions, checks, approvals, and what to do if something is missing or goes wrong.

Outputs

Name each new information item this step produces and what it contains, or write none.

Required resources

Systems or workspaces this step needs access to.

Suggested resources

Helpful, but the step can run without them.

Hub setup, if known: use registered names. Otherwise leave these for the facilitator.
